Quantum Loop

Iteration 2

*A symbol of love
An everlasting bond
It whispers of vows spoken in secret
Of stolen glances and longing gazes
Of hands clasped in the darkness
And hearts beating as one*

*The quantum loop, a silken thread
Woven through the webs of time*

*It is a reminder of the past
A testament to the present
A meaning from the future
As long as we follow the signs
Our hearts will be connected
And our love will never be broken*

*The quantum loop, a silken thread
Woven through the webs of time*

*In a universe so vast and wide
Searching for that heart of mine
Through the heartache, through the pains
Every signs brought me here
To the love I have held so dear
In this loop, it's you and me*

Spoken Word: **Alice**

Voice Programming/Lyrics/Composer: **Laurent Colson**

In-Between

5:04

*I feel lost in my head
Half in this world
Half in the other world
I don't know where I belong*

*Suspended in the air
Between two worlds*

*Dreams and truth intertwine
Searching for the light*

*In-between
Dreams roam
Lost in worlds
I'm adrift*

*In-between
Dreams roam
Lost in worlds
I'm adrift*

*In-between
Dreams roam
Lost in worlds
I'm adrift*

*In-between
Dreams roam
Lost in worlds
I'm adrift*

*I'm adrift
I'm adrift*

Spoken Word: **Gabriel**
Voice Programming/Lyrics/Composer: **Laurent Colson**

Inward Path

6:02

*We find our chains
Break the cycle
You say you fear
The great unknown*

*Nothing immortal
Everything eternal
Whispers from the future
Limiting external
Towards my inward path
I will know the truth
Understand this void
In this vast universe*

*Shed those old skins
No limits here
Let dreams come true
Where time is ours*

*Nothing immortal,
Everything eternal
Whispers from the future
Limiting external
Towards my inward path
(In every habit)
I will know the truth
(Break the cycle)
Understand this void
(Embrace the new)
In this vast universe
(No limits here)*

Voice Programming/Lyrics/Composer: **Laurent Colson**

The Darkest Love

5:30

*In the darkest of nights
I found you, my love
Your eyes were like stars
And your skin was like snow*

*I remember you
My forbidden love
You are my everything
And I will never let you go*

*Our love is the darkest
It is a forbidden flame
A love that cannot be
A love that will never die
In the shadows of our mind
When the world is asleep
We meet in a secret dream
To share what is missing*

*We are from different worlds
We are forbidden to be together
But our love is too strong
It cannot be denied*

*Our love is the darkest
It is a forbidden flame
A love that cannot be
A love that will never die
In the shadows of our mind
When the world is asleep
We meet in a secret dream
To share what is missing*

*We are cursed by the gods
To be together in darkness
Our love is a tragedy
But it is our only salvation*

*Our love is the darkest
It is a forbidden flame
A love that cannot be
A love that will never die
In the shadows of our mind
When the world is asleep
We meet in a secret dream
To share what is missing*

*Our love is the darkest
It is a forbidden flame
A love that cannot be
A love that will never die
In the shadows of our mind
When the world is asleep
We meet in a secret dream
To share what is missing*

*In the end, we will be together
In the darkness of the night
Our love will never die
It is the darkest love*

Spoken Word: **Gabriel**

Voice Programming/Lyrics/Composer: **Laurent Colson**

Forgotten Transmission

Alternate Universe i99t

4:44

*A message of love
Sent across the stars
Lost in space and time
Trapped in time's embrace*

*Years passed by
Decades turned to dust
Two souls, alone
Their love in silence
The message drifted
Through the endless void
Until the day where
It reached destination*

*The message was found
Later than expected
But not too late
To mend broken hearts*

*Years passed by
Decades turned to dust
Two souls, alone
Their love in silence
The message drifted
Through the endless void
Until the day where
It reached destination*

*Finally together
In the twilight of their years
Their love, once lost
Now forever theirs*

*Years passed by
Decades turned to dust
Two souls, alone
Their love in silence
The message drifted
Through the endless void
Until the day where
It reached destination*

Voice Programming/Lyrics/Composer: **Laurent Colson**

Follow Me

5:28

*Leave your fears
In darkness
I'll guide you
We are bound*

*Take my hand
Close your eyes
Follow me
In my dream*

*Silent screams
No sound
In the depths
Side by side*

*Take my hand
Close your eyes
Follow me
In my dream*

*Afraid alone
Lost in dark
You are trapped
In your pain*

*Take my hand
Close your eyes
Follow me
In my dream*

Voice Programming/Lyrics/Composer: **Laurent Colson**

Synchronicity

6:32

*In a place, unknown
I see you, a shadow, a shape
Something common
Split into fragments, exploded
Empty feeling, alone*

*In the silence of time
The past meets the future
Connection, paradox, emotions
Eternal echo in my mind, breath
Temporal distortion, timeless expansion*

*In this enigmatic unconscious
Where shadows intertwine with possibilities
A profound connection emerges
A profound connection emerges
A profound connection emerges
A profound connection emerges*

Spoken Word: **Muriel**
Voice Programming/Lyrics/Composer: **Laurent Colson**

Fading Echoes of Love

5:32

*Empty streets, silent cries
Love's demise, heavy skies
Promises turned in lies
Fading love, as time flies*

*Rainy days, love's decay
Whispers fade, hearts astray
Tears like rain, can't convey
Broken dreams, we've lost our way*

*Memories, shadows fall
Once bright love, now a pall
Echoes of distant call
Lost in grief, endless sprawl*

*Emptiness in my chest
Love's departure, arrest
Searching for what's suppressed
In this pain, I'm blessed*

*Rainy days, love's decay
Whispers fade, hearts astray
Tears like rain, can't convey
Broken dreams, we've lost our way*

*Fading dreams, love's farewell
In darkness, I dwell
Tale turned into knell
Lost in grief, binding spell*

Voice Programming/Lyrics/Composer: **Laurent Colson**

Chimeric Whispers

5:26

*Your whispers linger in my mind
Awake in a reverie*

*Forever and ever
Forever and ever*

*All I want is you
No more cries, no more tears
Frozen in dread
I sense you in my dreams*

*Let's let this moment glide
Your touch envelops me*

*All I want is you
No more cries, no more tears
Frozen in dread
I sense you in my dreams*

*All I want is you
No more cries, no more tears
Frozen in dread
I sense you in my dreams*

In my own world
I don't see your light
How can we link?*

In the silence
I don't hear your voice
How can we love?*

*Hope in the void
Hope in the void
Hope in the void*

*Wandering here
Through the shadows
I can't feel your touch
How can we connect?*

How can we belong?*

Just you and me
Suspended in the immensity
As we share this moment*

We sit, side by side
To find our own world
Where time is just a distant memory*

With the music of the spheres
The universe stretches out
Under a canopy of galaxies*

Is a moment out of time
In this infinite universe, together
We have made the stars our home*
